

JOIN US IN BUILDING A CARBON NEUTRAL FUTURE

Leaf designs, manufactures, and upcycles carbon neutral and carbon negative building solutions using sustainable materials.

We work with architects, owners, governments and corporations to create beautiful, long lasting, low maintenance facade, cladding, and surfacing solutions with the lowest carbon footprint possible; low carbon is our mission and our client's designs our inspiration. Whether you're looking for an off the shelf solution or a custom designed facade, Leaf has the product for your needs.

Our unparalleled commitment to reducing the carbon footprint in building products is matched with our exclusive, end of life buyback guarantee, “**LeafCycle®**”. All Leaf products are fully recyclable and can either be re-purposed into new surfacing solutions or be donated to low cost or emergency housing projects.

BUILDING SOLUTIONS

**NATURAL, CARBON NEUTRAL, AND
LONG LASTING BUILDING PRODUCTS**

OUR MISSION IS TO CHANGE THE WAY THE WORLD BUILDS

As an organization, we are dedicated to interpreting, designing and building architectural solutions that add to the shared values of sustainability and good design with our clients.

Leaf uses only renewable materials in our substrates and we finish our products in water-based coatings and mechanical surfacing solutions through CNC and laser technologies.

A photograph of a modern building's courtyard. The building features a facade of vertical wooden slats and large glass panels. A glass-enclosed upper level is visible, reflecting the sky and surrounding buildings. A small tree in a planter sits in the foreground on the left. A glass door with a wooden frame is centered in the lower level. A security camera is mounted on the right wall. The text "YOUR CHALLENGES ARE OUR SOLUTIONS" is overlaid in white capital letters across the middle of the image.

YOUR CHALLENGES ARE OUR SOLUTIONS

YOUR CHALLENGES ARE OUR SOLUTIONS

Our solutions are created from your architectural and environmental design demands.

Leaf's clients set the pace, and our mission is to deliver a long life product with the lowest carbon footprint possible. We will always recommend achieving the lowest carbon solution, often translating to a lower up front cost.

All of our products are guaranteed for at least 50 years and will maintain their natural beauty throughout that time with proper cleaning and care. However, in the case of decorative facades for storefronts which may have a shorter life cycle due to corporate design needs, changing aesthetics, or relocation needs, we can guarantee to reuse the original facade through our "Leafcycle®" program.

We live in a world with finite resources and we embrace this simple premise as a guide to everything we do. The discussion of “cost” at Leaf always includes the external and internal, relating not only to our product’s performance, but as to how they are made and their effect on the environment in the short and long term.

Leaf is community, environment, and business working together to change the way we build.

LEAF SETS THE PACE IN CARBON NEUTRAL BUILDING

Design freedom

**60 year minimum life
(BRE)***

50 years warranty

Sustainable

*According to independent tests by the British Research Establishment

CARBON NEUTRAL SOLUTIONS MEETING STRINGENT CORPORATE REQUIREMENTS

Commercial facades - decorative, ventilated,
rainscreen and more, built to last.

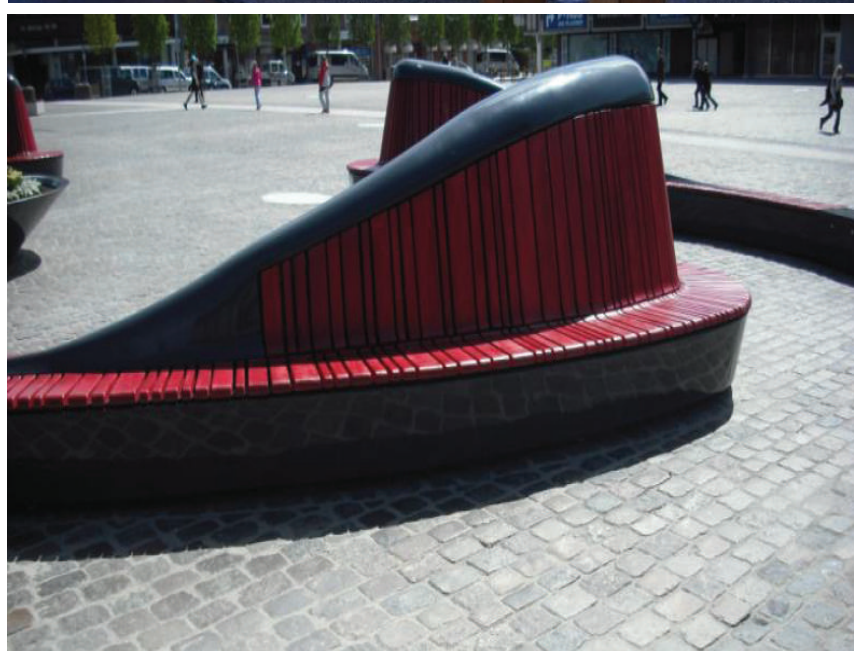

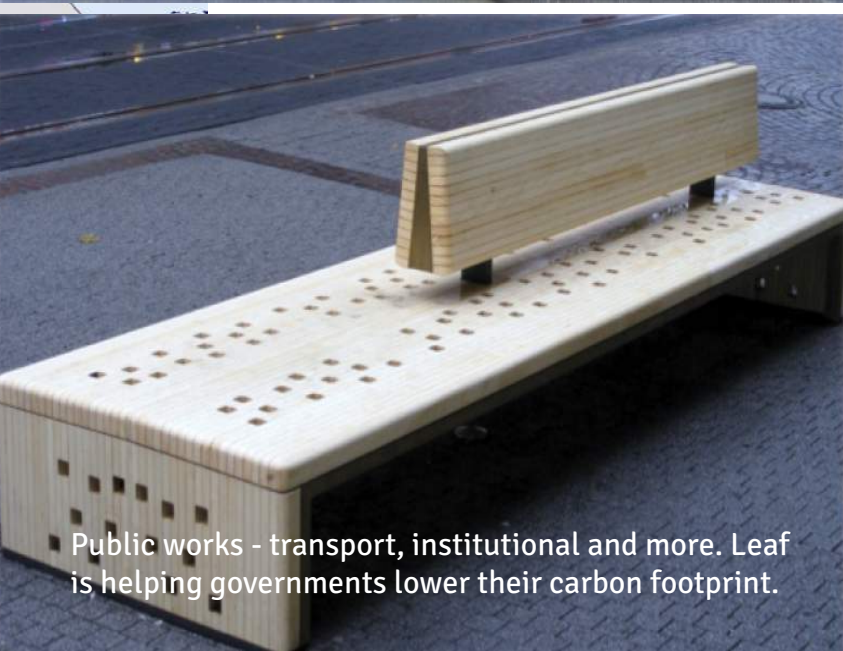

BOSCH

Corporate logos based in renewable materials
can now replace plastics and metals

CARBON NEUTRAL SOLUTIONS MEETING STRINGENT GOVERNMENT REQUIREMENTS

Education - schools and universities use our products to reduce maintenance costs

Public works - transport, institutional and more. Leaf is helping governments lower their carbon footprint.

CARBON NEUTRAL SOLUTIONS MEETING STRINGENT RESIDENTIAL REQUIREMENTS

A modern, minimalist residential building with a light-colored facade and vertical cladding elements. The building features large windows and a flat roof. In the foreground, there are two olive trees on a green lawn. The background shows a clear blue sky and a distant horizon.

Residential facades and cladding products. Leaf allows home owners to enjoy their properties with low maintenance, modified wood solutions which are free from harmful chemicals.

Commercial and residential surfacing.
Leaf products serve the most demanding of application.
